

Lower Entiat Public Access Points – Draft Brochure 01/14/09

Design Style & Colors

- The brochure layout, colors, and text were designed to reflect elements of the Annual Report template currently being developed. The intention is to create a visual identity that can be used on all public communication pieces.

Text Components

- Description of each access point identified on the map of the lower Entiat River.
- Tips encouraging people to help care for the watershed by recreating responsibly.
- Information on the Entiat Watershed Planning Unit.

Map

- Simplified view of the lower Entiat River with hillshade, waterways, and main roads depicted and labeled when appropriate. Please note that the labels will be enlarged in the final draft and the section lines in the hillshade will be removed.

Photos

- Photos for print publications need to be of high resolution (300 dpi). The photos included in the draft design are stock photography purchased online.

Please review the draft brochure and provide your comments by **Friday, January 23** to Sarah Rudback at the Cascadia Conservation District by returning this form to Mike Rickel at today's EWPU meeting or by writing to sarah.rudback@wa.nacdnet.net. A final draft of the brochure will be brought to the April EWPU meeting for review.
