

Introduction to Survey

In order to better serve our community the Entiat Watershed Planning Unit would like your help identifying areas of focus concerning natural resources in the valley. It is our hope to re-focus on issues that were tabled in the initial effort and discover new concerns. Please take a moment to complete this survey and return. This brochure is designed to keep your responses confidential, or you can include your contact information if you would like to receive more information about the Entiat Watershed Planning Unit or Cascadia Conservation District.

This information will help guide future efforts including; public meetings, educational outreach, agency support, and update our coordinated natural resource management plan. The results of the survey will be published in an upcoming Entiat Leader insert and be presented at the spring Entiat Watershed Planning Unit meeting.

Entiat Watershed Planning Unit

EWPU formed in 1993 after a group of local Entiat landowners concerned about Entiat natural resources, partnered with Cascadia

Conservation District to form the first Coordinated Resource Management Plan in North Central Washington. The Planning Unit has received national recognition for their success in working toward creative and collaborative solutions to natural resource issues such as improving and maintaining water supply for farmers, residents, and fish. We would like to thank the community for their continued support and efforts to re-open steelhead fisheries on the Entiat River. Find more information on our quarterly meetings at: www.cascadiaed.org

Cascadia Conservation District

Cascadia Conservation District is a non-regulatory, grant-funded organization dedicated to encouraging voluntary and locally driven wise stewardship and conservation of all natural resources. Our board members and staff work cooperatively with local landowners and communities to provide technical and financial assistance for soil, water, forest, fish and wildlife conservation efforts. Cascadia encourages local citizen participation and partnership in efforts to improve Entiat Valley natural resources.

Programs include:

- Watershed Planning & Implementation
- Wildlife Preparedness
- Water Metering
- Stream Flow Monitoring
- Landowner Assistance
- Education & Outreach
- Water Quality Monitoring & Implementation
